

Stream No. 7 (1 notice)

Port Chalmers, Montague Island.

Width: 10 feet

Depth: 6 inches

Accessible about 1,000 feet. Fish up only 800 feet.

Fine gravel near mouth, coarser further up.

July 15, 1926: Lots of dogs in all these streams.

Aug. 20, 1926: 1,500 fish alive and dead, all estimates,
including dead.

Sept. 6, 1927: 9,600 fish.

Stream No. 8 (1 notice)

Port Chalmers.

Width: 9 feet

Depth: 4 inches

Accessible 1/4 mile.

Has a coarse gravel bottom and some wide places deeper.

Aug. 24, 1926: 2,000 fish. Dead ones,--mostly dogs.

Sept. 6, 1927: 4,300 fish.

Stream No. 9 (2 notices)

S. E. end Port Chalmers.

Width: 20 feet

Depth: 6 inches

Clear water. Full of dog salmon. Has all fine gravel bottom and wide places in it inside the grass banks. It splits up into several parts. Fish in some places are up 2,000 feet above the grass banks. High tides go up about 300 or 400 feet.

Aug. 11, 1925: No estimate, but lots of fish.

Aug. 24, 1926: 14,000 live fish and 7,000 dead. Nearly all dogs.

Sept. 7, 1927: 30,000 fish.

Stream No. 10A (2 notices)

There is a long salt-water slough here and 2 streams. One enters slough about 600 feet south of the lumber near the end of slough and comes from the east. The other enters slough near its first bend east after leaving gravel spit. Each one is 8 feet wide and 3 inches deep. Have good bottom. North one slightly larger and longer.

Sept. 29, 1928: 3,000 fish spawned here. All dead.
